

CONTI® TOOL BOX *ASIAN CARS*

For the professional
timing belt replacement

Power Transmission Group

The CONTI® TOOL BOX ASIAN CARS

A new tool box enables auto mechanics to properly replace timing belts, specifically on Asian cars. The CONTI® TOOL BOX ASIAN CARS contains 26 mounting tools, such as, for example, a setting gage for the camshaft as well as various setpins/locking pins and arrestors. The new set furnishes what is needed to safely and professionally change timing belts on the most common Asian cars. It is conceived as an ideal complement to the CONTI® TOOL BOX.

Asian makes and models account for a growing share of the vehicles offered on the global vehicle market, making this segment also increasingly important for the automotive aftermarket. About 15% of the vehicles on Europe's roads and over 30% of worldwide auto

production are already of Asian origin. Both percentages are expected to continue to rise in the next few years. Spare parts and mounting tools designed specifically for these vehicles are thus increasingly important.

The application areas for all of the set's tools are listed in an overview so that the mechanic can quickly and easily find the right tools for the respective vehicle.

The CONTI® TOOL BOX ASIAN CARS is available from specialist dealers.
