

**NEW!**  
The Timing Belt Kit  
with Water Pump  
Cool down and  
play it safe!

Power Transmission Group

**Complete, reliable and perfectly matched:**

# The new water pump kit from ContiTech

Original quality is the best replacement. This includes the new water pump kit from ContiTech, which contains the CONTI SYNCHROBELT® timing belt, tensioner and deflection pulleys as well as a water pump. All components meet the strict requirements for original equipment. The new kits are available for common vehicle models.

## Prevention and cost-efficiency

When it's time for a new belt, all of the elements should be replaced, and that includes the water pump if it is also driven by the timing belt. To ensure that the system works perfectly, the water pump should also always be replaced together with the belt and the pulleys as a precautionary measure. From an economic point of view, it makes sense to replace all the drive components in one procedure.

## Numerous advantages

Motorists are playing it safe whenever they have the belt, tensioner and deflection pulleys as well as water pump replaced at the same time, especially since the components are then perfectly matched to each other. This provides mechanics with the best possible means of protecting themselves from warranty claims. In addition, workshops benefit from the fact that they need not order parts individually, and that the parts are also cross-referenced to each other. Furthermore, one kit means that just one item has to be ordered, simplifying the administrative tasks involved in processing and receiving goods. And only one storage area is needed to store several pieces. The new complete package is the logical next step in ContiTech's philosophy of providing kits for the industry.

## Original equipment quality

As original equipment supplier, ContiTech develops and manufactures timing belts, V-belts and multiple V-ribbed belts as well as kits for all leading carmakers. The OE products are also available in original-equipment quality for automotive aftermarket requirements. The water pumps and tensioner pulleys contained in these complete packages also of course meet this OE standard. So without the water pump, nothing would work. Play it safe with the new water pump kit from ContiTech!

### Impressive advantages:

- ◉ Original equipment quality
- ◉ Enhanced reliability for engine and vehicle owner
- ◉ Individual parts need not be ordered
- ◉ Precise cross-referencing
- ◉ Suitable for common vehicle models
- ◉ One contact for all components

### Comprehensive parts kit:

- ◉ CONTI SYNCHROBELT® timing belt
- ◉ Water pump with seal
- ◉ Tensioner and deflection pulleys
